

ITP Tires
ITP Holeshot SxS
F-\$91.95 R-\$96.95

About:

Legendary ATV track and trail performance is now available for side-by-side UTVs! The all-new Holeshot SxS is designed to be the ultimate short-course UTV racing tire. Super strong 6-ply bias construction helps the UTV track straight and sure under acceleration and braking. Siped (thinly cut) knobs provide more biting edges for exceptional traction and balanced cornering. Unlike many other tires now being used for UTV competition, the Holeshot SxS steers easily, rides smooth and is very light in weight!

Our Thoughts:

ITP's first entry into the competitive Side X Side short course racing market is a success. These tires offer great traction and hard acceleration on hard packed tracks. With the 25" tall tire it is a perfect fit for the Rhino or RZR. For the Teryx owners it would be nice to see a 26" tire available.

Pros:

The rear tire profile is flat and holds shape well under hard cornering and the soft compound and siping provides for great traction on dry and hard courses.

www.itptires.com (909) 390-1905

Cons:

The Holeshot tire is only available in a 25" tall tire.
