LINEUP
FOR 2006**

Shorter days and cooler weather can mean only one thing: sand dune season is back! Now's the time to get your sport quad ready for some serious roost action, and there's no better place to start than ITP.

ITP offers a wide range of high-tech, great-looking sand tires and wheels, products that will immediately deliver a whole new level of balanced traction, steering, flotation, reliability and overall performance.

Take the Sand Star, for example. The rear Sand Star is available in a size for nearly any sport ATV application: 20x11-8, 20x11-9, 20x11-10, 22x11-10; the front Sand Star is available in 21x7-10 and 22x8-10 sizes. And we haven't forgotten mini quad riders, either. Sand Stars are also available in sizes of 19x6-10 in the front and 18x9.5-8 in the rear!

But if you're looking for something to set yourself apart from the crowd—and who isn't—you have to check out ITP's new 12-inch Sand Star models. These low-profile tires create a truly unique appearance and work as good as they look on dune cruisers and big-bore sport ATVs. They're available in a 22x8-12 size in front, and a 22x11-12 out back.

All Sand Star rear tires feature eight 30mm main paddles as well as eight mini-scoops. This patent-pending design provides much quicker hook-up and acceleration than anything on the market today, while maintaining exceptional cornering capability. The front Sand Star uses a patent-pending dual rib design for unmatched steering control. Both the front and rear Sand Stars feature molded-in ITP logos and are extremely light in weight yet amazingly durable, and utilize a unique rubber compound developed for

ARE YOU READY?

ITP's 12-inch Sand Stars work and look great on dune cruisers and big-bore sport ATVs.

an ideal balance of flotation, flexibility and cornering capability.

The perfect place to put the Sand Star is on an ITP C-Series one-piece aluminum wheel. Available in several eye-catching styles and finishes, the ITP C-Series wheel is available in 8-, 9-, 10- and 12-inch sizes, and each is manufactured through ITP's high-tech Advancecast process to ensure the highest level of strength at the lowest possible weight.

But don't just take our word for it, be sure to check out the "Magazine Reviews" section of ITP's website (www.itptires.com) for many more good words.

We're totally fired-up to hit the sand dunes this season! We hope to see you there, on ITP tires and wheels.
